Basic Thermal Physics

F. Reif

Contents

1 **Understanding Macroscopic Systems** ..... §
- A. Macroscopic systems and atomic knowledge ..... §
- B. Atomic and macroscopic descriptions ..... §
- C. Summary ..... §

2 **Work and Heat** ..... §
- A. Macroscopic work ..... §
- B. Thermodynamic energy law ..... §
- C. Measuring internal energy and heat ..... §
- D. Applications of the thermodynamic energy law ..... §
- E. Summary ..... §

3 **Statistical Description of Macroscopic Systems** ..... §
- A. Statistical descriptions ..... §
- B. Statistical theory of macroscopic systems ..... §
- C. Summary ..... §

4 **General Properties of Macroscopic Systems** ..... §
- A. Equilibrium situations ..... §
- B. Fluctuations in equilibrium ..... §
- C. Approach to equilibrium ..... §
- D. Irreversibility ..... §
- E. Basic states and entropy ..... §
- F. Properties of the entropy ..... §
- G. Summary ..... §

5 **Thermal Interaction** ..... §
- A. Thermal equilibrium ..... §
- B. Approach to thermal equilibrium ..... §
- C. Summary ..... §

6 **Ideal Gases and Temperature Measurement** ..... §
- A. Kinetic energy and absolute temperature ..... §
- B. Pressure, temperature, and volume ..... §
- C. Measurement of absolute temperature ..... §
- D. Molecular quantities and Boltzmann's constant ..... §
- E. Summary ..... §

7 **Heat Capacity and Heat Transfer** ..... §
- A. Heat capacity ..... §
- B. Specific heat ..... §
- C. Heat capacities and thermal interaction ..... §
- D. Heat capacity and entropy ..... §
- E. Isothermal and adiabatic processes of ideal gases ..... §
- F. Heat transfer ..... §
- G. Summary ..... §

8 **General Thermodynamic Interaction** ..... §
- A. Entropy change in a quasi-static process ..... §

B. Implications of the entropy-heat relation ..... §
C. Principles of statistical thermodynamics ..... §
D. Summary ..... §

9 Important Applications ..... §
A. Heat engines and biological systems ..... §
B. Phase transformations ..... §
C. Probabilities at a constant temperature ..... §
D. Summary ..... §

Appendices ..... §
A. Review of logarithms ..... §
B. Calculus with logarithms ..... §
C. Summary of statistical thermodynamics ..... §
D. Modifications due to quantum mechanics ..... §
E. Physical constants ..... §
F. Greek alphabet ..... §

Hints and Answers ..... §

Index ..... §
